OBJECTIVE

Final-year Master's Engineering student specializing in Artificial Intelligence, Computer Vision, and Full-Stack Development. Having recently completed a one-year academic exchange at Kumamoto University in Japan, I am seeking a **5 to 6-month end-of-studies engineering internship** starting in **February or March 2027** (open to locations in Japan or Europe).

EDUCATION

ENSC - Bordeaux INP (National School of Cognitive Engineering) | *Bordeaux, France Master's Degree in Engineering (M.Sc. / Diplôme d'Ingénieur) – Specialization in AI & Software Engineering* | **2024 – 2027**

- Relevant coursework: Artificial Intelligence, software architecture, human-computer interaction (HCI), applied mathematics.

Kumamoto University – Graduate School of Science and Technology | *Kumamoto, Japan One-Year Academic Exchange Program* | **Sept 2025 – Aug 2026**

- Focused on computer vision, data engineering, and embedded hardware profiling.

Cycle Préparatoire de Bordeaux (CPBx) – University of Bordeaux | *Bordeaux, France Intensive Undergraduate Program in Mathematics and Physics* | **2022 – 2024**

TECHNICAL SKILLS

- **AI and Computer Vision:** Python, PyTorch, OpenCV, image processing, neural rendering concepts.
- **Software and Full-Stack Development:** C++, C#, Dart (Flutter), JavaScript, React.js (Vite), Node.js, HTML5, CSS3, SQL, Git.
- **UI/UX Design, Prototyping:** Figma, Jitter, Adobe Photoshop, WatchFace Studio, DaVinci Resolve.
- **Applied Mathematics:** Linear algebra, probability and statistics, algorithmic complexity and optimization.

R&D AND SOFTWARE PROJECTS

Neural Rendering and Low-Latency Temporal Supersampling (ExtraNet) | *Kumamoto University, Japan (2026)*

- Conducted an in-depth technical analysis and graduate seminar on the ExtraNet frame extrapolation using G-buffers and motion vectors for neural in-painting and shadow prediction via gated convolutions.

Swipe Clean – Mobile Application (In Production) | *Personal Project (2025 – Present)*

- Designed, developed, and deployed an Android application built with **Flutter (Dart)** for photo sorting and storage optimization.

Wear OS Ecosystem and Google Play Console Administration | *ENSC / Personal Projects (2024 – Present)*

- Engineered and published 3 production applications on the Google Play Store, including custom Wear OS watch faces and an Android companion app.

Portfolio website | *Personal Project (2026)*

- Designed and developed a personal portfolio web application using React and Vite, featuring a responsive layout and custom UI components to showcase software engineering projects and multimedia work.

WORK EXPERIENCE

UI/UX & Motion Designer (Freelance Missions) | *i2c Junior Enterprise – Bordeaux, France (2025 – 2026)*

- **Madic Group:** Created vector illustrations and interactive motion design animations (Figma, Jitter) for a commercial gas station terminal interface.
- **SNS Solutions:** Designed user flows and interactive mobile UI/UX prototypes (Figma) for a delivery application.

LANGUAGES & CERTIFICATIONS

- **Languages:** French (Native), English (Professional Working Proficiency – B2, TOEIC: 865), Japanese (Beginner / JLPT N5 level – lived 1 year in Japan), Spanish (Elementary – A2).
- **Certifications:** French Aeronautical Initiation Certificate (BIA – *Brevet d'Initiation à l'Aéronautique*, 2019).
- **Interests:** Digital photography and videography (Sony A6000 paired with vintage manual Canon FL/FD lenses), International travel (1 year in Japan, 3 weeks in California).
